The family Tabanidae (horse and deer flies) is represented in British Columbia by 8 genera and 63 known species. The list and its nomenclature follow Tesky (1990).

Apatolestes comastes Williston

Stonemyia californica (Bigot)

Stonemyia fera (Williston)

Silvius gigantulus (Loew)

Chrysops aestuans Van der Wulp

Chrysops asbestos Philip

Chrysops ater Macquart

Chrysops coloradensis Bigot

Chrysops dawsoni Philip

Chrysops discalis Williston

Chrysops excitans Walker

Chrysops frigidus Osten Sacken

Chrysops fulvaster Osten Sacken

Chrysops furcatus Walker

Chrysops mitis Osten Sacken

Chrysops nigripes Zetterstedt

Chrysops noctifer Osten Sacken

Chrysops proclivis Osten Sacken

Chrysops surdus Osten Sacken

Haematopota americana Osten Sacken

Hybomitra aasa Philip

Hybomitra affinis (Kirby)

Hybomitra arpadi (Szilady)

Hybomitra astuta (Osten Sacken)

Hybomitra atrobasis (McDunnough)

Hybomitra californica (Marten)

Hybomitra captonis (Marten)

Hybomitra enigmata Tesky

Hybomitra epistates Osten Sacken

Hybomitra frontalis (Walker)

Hybomitra fulvilateralis (Macquart)
Hybomitra hearlei (Philip)
Hybomitra illota (Osten Sacken)
Hybomitra itasca Philip
Hybomitra lanifera (McDunnough)
Hybomitra lasiophthalma (Macquart)
Hybomitra liorhina (Philip)
Hybomitra lurida (Fallén)
Hybomitra melanorhina (Bigot)
Hybomitra nitidifrons (Szilady) ssp. *nuda* (McDunnough)
Hybomitra osburni (Hine)
Hybomitra pechumani Teskey and Thomas
Hybomitra procyon (Osten Sacken)
Hybomitra rupestris (McDunnough)
Hybomitra sonomensis (Osten Sacken)
Hybomitra tetrica (Marten)
Hybomitra trepida (McDunnough)
Hybomitra zonalis (Kirby)
Hybomitra zygota Philip

Atylotus calcar Tesky
Atyloyus insuetus (Osten Sacken)
Atyloyus sublunaticornis (Zetterstedt)
Atylotus tinguareus (Philip)

Tabanus aegrotus Osten Sacken
Tabanus fratellus Williston
Tabanus kesseli Philip
Tabanus laticeps Hine
Tabanus marginalis Fabricius
Tabanus punctifer Osten Sacken
Tabanus reinwardti Wiedemann
Tabanus sequax Williston
Tabanus similis Macquart
Tabanus stonei Philip
