THE UNIVERSITY OF BRITISH COLUMBIA

Geography 350: Introduction to Urban Geography

Geography 350: An Introduction to Urban Geography
September-December 2014, 3 credits
Tuesdays and Thursdays, 3:30-5:00, Geography Room 212
Elvin K. Wyly, Associate Professor, Chair, Urban Studies Program
Office: Geography Room 132
Telephone numbers: 604 682 1750 (home), 778 899 7906 (cell), email ewyly@geog.ubc.ca
Course Web Page: http://www.geog.ubc.ca/~ewyly/g350.html

Short course description: City systems and theories of urban location; internal spatial structure of the city; commercial and industrial location; social areas; neighbourhood and land use change; urban trends and public policy.

A bit more detail: We live in a rapidly urbanizing world: half of the world’s population now lives in cities, and all trends point to the rise of scores of multi-million “megacities” and a dramatic increase in urban populations across Asia, Latin America, and Africa. The roster of urban regions with more than twenty million inhabitants now includes Tokyo-Yokohama, Seoul,
Mexico City, New York, Mumbai (Bombay), Delhi, and Sao Paulo.\textsuperscript{1} In China, ten million people move to existing cities each year, while the government plans to build more than 300 entirely new cities. China’s rapid urbanization will continue for a generation or more: while the urban population share recently crossed the fifty-percent threshold, the level is only about three-fifths the urban share of the United Kingdom, Brazil, the United States, and Canada.\textsuperscript{2} On a recent visit to India, then-UBC President Stephen Toope met with China’s Minister of Human Resources, who told him that the current pace of economic expansion would require the creation of about 800 new universities over the next decade -- each with 60,000 students or more. “That is 800 new UBCs with 48 million new student spaces,” Toope reflected, in a rapidly developing and urbanizing society where the ambition is “breathtaking ... and ... the striving, the competitiveness, is insistent.”\textsuperscript{3}

The world’s fastest-growing city -- Lagos, Nigeria -- is expected to double its population within the next five years, to more than 22 million.\textsuperscript{4} Meanwhile, urbanization has nearly leveled off across most of Western Europe and North America, where the modern era of industrialization first created fully urbanized societies more than a century ago. In some cases, urbanization seems to have slipped into reverse. In 1950, the population of Detroit, Michigan topped 1.8 million; decline set in during the 1950s, however, and has continued ever since. Now the city is down to 912 thousand, and loses almost five thousand people every year -- even as the broader metropolitan region, with its ring of wealthy and middle-class suburbs surrounding the distressed central city, continues to grow at a modest pace.\textsuperscript{5}

Cities highlight the best and worst of everything. They also reveal the most remarkable contradictions of our time. Globalization blurs the old borders of nation-states with transnational flows of money, people, goods and ideas. Yet urban centers are becoming \textit{more} important in the face of globalization, either as control points in complex networks of capital investment and trade, or as meeting-points for upwardly-mobile immigrants, destitute refugees, footloose investors, maverick entrepreneurs, and tourists in search of a good time. Internet evangelists and venture capitalists travel between Toronto, New York, London, Tokyo, Silicon Valley, and Las Vegas to attend lavish conferences celebrating technologies that hold out the promise of eliminating the hassle of traveling to expensive, congested cities (like Toronto, New York, London, Tokyo ...) for face-to-face meetings. Meanwhile, central bankers and trade ministers travel from city to city to meet in fortified hotels to discuss the need for open borders for free trade and investment, while on the other side of the barricades alliances of activists march in the streets to protest corporate power, the destruction of labor rights, and environmental degradation. So now any city that hosts international trade meetings must also host armadas of police.

\textsuperscript{4} Beazley, \textit{Snapshot}, p. 34.
intelligence, and security officials who keep watchful eyes and comprehensive files on the protests and the protesters.6

How do we make sense of this dizzying blur of city stories? This course provides an introduction to theories of urban processes and urban change. We begin with theories of the origin, growth, and development of cities, and then we study their contemporary economic functions, spatial structure, and socio-cultural characteristics. We then turn to several current urban debates and public policy controversies. Throughout the course, we will examine the interplay between established or ‘classical’ theories of the city, and new efforts to understand new processes, new problems, and new opportunities. Most current issues have an explicitly urban dimension; many debates are impossible to comprehend without some appreciation of basic urban theory.

Schedule

Below is a preliminary schedule, subject to change. For the latest version, see

http://www.geog.ubc.ca/~ewyly/Private/g350schedule.html

Tuesday, September 2. UBC Imagine Day. All undergraduate classes cancelled. Read the syllabus, and browse a bit of the course web page.

Saturday, September 6. Walking Tour of Vancouver. Optional, but I strongly recommend you join us if you can! Meet me at the intersection of Georgia & Granville Streets, right downtown, 9:00 am. Reach me on a voice call at 778 899 7906.

Tuesday, October 7. Midterm Examination.

Tuesday, November 11. Remembrance Day, UBC Closed.

Textbooks

Evaluation and Marks

Course marks are based on three items:

1. Mid-term examination (multiple choice)  
2. Independent written project (approx. 2,500 words)  
3. Final examination (multiple choice and essay)
Deadlines

1. Mid-term examination: Tuesday, October 7, in class.

2. Project Submission Date 1: Thursday, October 16, in class.

3. Project Submission Date 2: Tuesday, November 4, in class.

4. Final examination: December examination period. All projects not previously submitted must be submitted in person at the examination.

Projects must be submitted in person, typed on standard letter-sized paper. You must include your name, student number, course number, and your preferred contact information on the first page. Revised and resubmitted projects must be delivered in person at the final examination, including the first version with TA comments as well as the new, revised version. Papers are not accepted by email.

You will note that while the course requires only one written project, there are multiple submission dates. This policy is intended to give you maximum flexibility in planning your coursework and various deadlines. Please note, however, that “maximum” means that no further flexibility can be provided: all communications regarding excuses or requests for extensions will be ignored. See further information on deadlines below.
The rest of this syllabus specifies various policies and procedures. I am very sorry for all the detailed regulations: if rules are rabbits, UBC is a bunny farm. The University has numerous policies and procedures, and one rule requires instructors to provide as much information as possible on the policies and procedures used in a course. So, on the following pages you’ll find the City Rules used in this course.

**City Rules.** Kowloon Park, Hong Kong, February 2010 (Elvin Wyly).
**Mid-term.** There are no alternate times for the mid-term except in documented cases of emergency or other provisions specified in formal University policies and regulations. If you miss the exam, then submit an additional written project.

**Final.** The final course examination date announced by the University is firm and non-negotiable. Instructors are required to submit final course marks promptly after the examination, and instructors do not have authority to grant standing deferred. If you find yourself in impossible circumstances when the final arrives, talk to one of the dedicated professionals in your Faculty advising office. They have the authority grant standing deferred.

University policy allows for make-up final examinations in the case of documented schedule conflicts -- but since University policy also mandates speedy grade submissions, this means that makeup final examinations can only be scheduled earlier than the regular announced exam.

**Projects.** Part of the course mark involves independent written work. You can choose any topic related to any of the major themes of the lectures and/or readings, and the course web site includes examples of papers submitted by students in previous years. For the best recent model, see

One paper idea: use the Zip et al. (2013) article as a model for how to analyze the biography and intellectual contributions of a prominent urban scholar from a previous generation to understand today’s fast-proliferating technological worlds of urban transformation. If you choose this option, you should identify a prominent urban scholar who died at least two decades ago, and read enough of their written scholarship to use their theories to analyze a major, fast-changing technological trend that is currently reshaping cities and urban life.

For other project ideas, guidance and recommendations are available for five specific kinds of urban-geographical inquiry. One involves an analysis of the changing occupational and/or industrial structure of a metropolitan area; one allows you to study population gains and losses among Canada’s largest cities and smaller urban centers; one gives you an opportunity to study the connections between globalizing cities; one allows you to compare and contrast urban conditions in Canada and the United States; and another gives you a chance to investigate the changing neighborhood patterns of social conditions in Vancouver neighborhoods. Additional information on the projects will be provided in class.

You are required to follow the general guidelines on written projects, at http://www.geog.ubc.ca/~ewyly/guidelines.html

Note especially that papers without the required signed certification specified in Guideline #1 will receive a mark of 0.
The written project submission dates are optional but firm. If you’d like comments on the strengths and weaknesses of your thinking and writing, we’re happy to provide detailed feedback and suggestions -- but only for those who meet the specified deadlines. Our Teaching Assistant will provide detailed comments on projects submitted on time, and the marked papers will be returned within one week. There is no penalty for submitting projects late. Submissions will be accepted any time until the course final examination. But late submissions will be graded late, with only a numerical score -- no detailed comments.

For essays submitted on time in one of the in-class deadlines, you are permitted to revise and resubmit your essay for another evaluation. Scholarship is a process, and it’s also a conversation. The comments provided by the TA on your first submission offer you the opportunity to revise your work -- to re-read scholarly sources to gain a better understanding of key issues, to re-think your analyses and interpretations, or to improve your writing skills. Our Teaching Assistant reads and marks all first submissions; I read and mark all re-submissions. If you re-submit a project, your mark will be the highest score of your first and revised submissions. If you choose to revise and resubmit, you must include the marked copy of your first submission when you turn in your revision, in person, typed on standard letter-sized paper, at the beginning of the final examination. Staple the first submission behind your revised, new submission.

Essays must be submitted in person. Submissions are not accepted by email.

Other Policies and Procedures

Here are some of the other specific policies the University encourages on course outlines. Regular attendance is required. Do not make travel arrangements for December until the final examination schedule is announced by the University. The University accommodates students with disabilities who have registered with the Disabilities Resource Centre. The University accommodates students whose religious obligations conflict with attendance, submitting assignments, or completing scheduled tests and examinations. Please let the instructor know in advance, preferably in the first week of class, if you will require any accommodation on these grounds. Students who plan to be absent for varsity athletics, family obligations, or other similar commitments, cannot assume they will be accommodated. Please review the UBC Calendar “Academic regulations” for the university policies on academic dishonesty, and visit www.arts.ubc.ca for useful information on correct documentation and avoiding plagiarism. Violations of academic integrity will result in severe sanctions.

Now let’s translate this bureaucratese. My job is play a small role in expanding your education in the Arts, by showing you a bit of the scope and significance of the interdisciplinary field of urban studies, and by inspiring and revealing the brilliant urbanist that can be found deep in your soul. Your job is to help me to do my job. Please do your best to get to class on time, and if you’re late, come in quietly through the back door. Please turn off any disruptive technological

---

7 Please do not overlook the first part of the phrase. In previous years, some students just re-submitted papers, without making any changes whatsoever, in the hopes that I would be an easier mark than the T.A. This is not a good idea. Revise your paper, considering the T.A.’s comments, questions, and recommendations. Teaching, learning, and scholarship can all be understood as forms of conversation.
distractions. I love it when my lectures are interrupted by interesting questions from real, live human beings -- but I’m not so thrilled about all the electronic beeps and rings that are constantly invading our lives. To cut through our information-saturated environment, I ask for your most valuable possession: your attention. Please come to class, and pay attention in a thoroughly low-tech, non-distance-education way. UBC is not an on-line university.\footnote{Yet. Cf. http://www.phoenix.edu. The Vancouver division, established in 1998, is their first international campus. Their combination of on-campus and on-line resources is called FlexNet\textregistered. My combination of in-person interaction and on-line resources is called Common Sense, but I have not yet applied for trademark protection. Stay tuned. Be forewarned, however, if the University of Phoenix succeeds with its heavy advertising budgets in convincing you to pursue your studies there. Not long ago, John Sperling, Phoenix’s chief executive, summed up their mission: “This is a corporation, not a social entity. Coming here is not a rite of passage. We are not trying to develop [students’] value systems or go in for that ‘expand their mind’ bullshit.” Quoted in Terri A. Hasseler (2006). “Fomenting Dissent on Campus.” Academe, May-June, 20-23, quote on p. 21.} I will make a number of materials available on the course web site, but please do not regard these as substitutes for attendance. The best way to know what happened in class is to be there. The second-best way is to ask someone you know, and whose judgment you respect, who was there.\footnote{Among the most frequently asked questions is, “Did I miss anything in last class?” or, even more curiously, “Did I miss anything important in last class?” Turn to your left, and introduce yourself. Turn to your right, and introduce yourself. Share contact information, and if you miss class, ask your colleagues and friends for notes, advice, and suggestions.}

Welcome to Urban Geography!

I think that’s all the detailed rules and regulations. If you’ve read this far, I am truly very sorry for all the bureaucratic and legalistic stuff. Really, honest, I am an easygoing person, and I just love urban stuff and hope to get you excited about it too. Urban geography is fascinating and engaging, and this class is pretty easy if we all do our jobs properly. The syllabus has become so detailed and strident because, over the years, stressed-out students have asked ever more detailed questions, or devised ever more creative excuses (“...but it was on time! I was on an airline, and we crossed the International Date Line, and ...”).

One more thing: the first five minutes of every lecture are yours, if you want them. Perhaps you’ve recently visited another city, and you took a photograph of something that illustrates one of the theories and processes we’re studying in class. Perhaps you’ve stumbled across a news story that merits discussion or raises questions. Come up to the front of the room before I begin the day’s lecture, and you can take a few minutes to share interesting items with everyone in the class.
