**UPDATE: Partial Connect Service Disruption – November 21, 2015 11:20 PT**

Posted by: Operations Centre | November 21, 2015

There is currently a disruption in Connect pertaining to editing content, posting items, or posting discussion board messages. When attempting to do some users have reported that they have received errors. This problem is not affecting all Connect servers so users may work around this issue by logging out of Connect, clearing their browser cookies, [...]

Update: Connect Service Disruption – 11 September 2015 12:15 PT

Posted by: Operations Centre | September 11, 2015

Connect response times have improved however we still do not know the root cause of the earlier issues and are continuing to investigate.

Our next update will be at 14:15 PT.

September 15, 2015: We will be undertaking a full restart of Connect between 5 and 7 am as we continue to work through the issues with Connect. Thank you for your patience as we work to resolve these issues.

September 14, 2015: We are experiencing intermittent problems with Connect access, however the application is available. If you have reached this page, please refresh your browser, clear your cache and attempt to log in again (http://bulletins.it.ubc.ca/2015/09/14/update-connect-service-disruption-%E2%80%93-september-14th-2015-1500-pt/)

We are working with Blackboard to resolve this issue and apologize for the disruption.

Connect Status Updates

Updated: September 20, 2015, 10:00 pm

Beginning around 9:30 pm on Sunday, September 20, 2015 we saw a recurrence of the ongoing issue with Connect and some users reported that they again were experiencing slow response times.

We are still working with Blackboard to identify the root cause of the underlying problem.
We sincerely apologize for the difficulties that you may have experienced during the last few days.

New information will be posted on this page as it becomes available. The UBC IT Bulletins Page and Twitter (@UBCITOutages) will also be updated with outage information as needed.

Updated: September 18, 2015, 3:00 pm

Connect has remained stable since Tuesday, September 16 and we continue to make a number of changes to the service in order to improve performance.

We are still working to identify the root cause and are not able to confirm the problem fully resolved. The last issue we experienced was a brief 10 minute disruption on Tuesday, September 15.

Overall, Connect performance for the first two weeks of the school year has been relatively stable. We recognize how important Connect is to the work of faculty, staff and students and it continues to be our top priority to eliminate or minimize service disruptions.

We sincerely apologize for the difficulties that you may have experienced during the last few days.

New information will be posted on this page as it becomes available. The UBC IT Bulletins Page and Twitter (@UBCITOutages) will also be updated with outage information as needed.

Updated: September 16, 2015, 4:00 pm

Connect has been stable since Monday, September 15 at 11:30 pm with the exception of a ten minute period on Tuesday morning and has remained so for the past 24 hours. We are continuing to monitor the system closely and are working to determine the root cause of the underlying issue.

New information will be posted on this page as it becomes available. The UBC IT Bulletins Page and Twitter (@UBCITOutages) will also be updated with outage information as needed.

Updated: September 16, 2015

We have been actively monitoring the Connect Learning Management System and, since Monday evening, response times have remained stable under steady load. We will continue to monitor and investigate the underlying issue and apologize for any
inconvenience this has caused at such a critical time in the term for faculty and students.

New information will be posted on this page as it becomes available. The UBC IT Bulletins Page and Twitter (@UBCITOutages) will also be updated with outage information as needed.

**Updated: September 15, 2015**

We are currently experiencing technical issues with the Connect Learning Management System that are causing service disruptions.

**What is going on?**
We have been experiencing technical issues with the Connect Learning Management System that are causing intermittently slower-than-expected response times (including, in some cases, the application becoming completely unresponsive). Some users have also encountered a “Connect Unavailable” page or an error message on login.

**Why is this happening?**
We are investigating each of the incidents to determine the root cause of the problem. We have escalated the issue to our application vendor (Blackboard) and they have technicians working with us to solve the issue.

**What is UBC IT doing?**
UBC IT has been working around the clock to resolve the issue through a large coordinated effort with all available resources including senior members of UBC IT and Blackboard. We are focusing on service restoration and root cause identification. On September 15, 2015 we were able to implement a mitigation strategy that has minimized the impact to students and faculty while we continue our investigation.

**When will it be fixed?**
This issue is of top priority and we are working to determine the root cause of the instability. We apologize for the disruption that this has had on teaching and learning at this critical time in the term for faculty and students. We will provide an update as more information becomes available.

New information will be posted on this page as it becomes available. The UBC IT Bulletins Page and Twitter (@UBCITOutages) will also be updated with outage information as needed.

**Updated: August 26, 2014**

**Preparation for the September Term**

Over the past few weeks, we have continued work in a number of areas with the goal of preparing Connect for September. We have engaged Blackboard to assist with performance and capacity tests.
to **simulate peak load** and to test a number of key pieces of **application functionality**. As a result of that testing, we have worked with Blackboard to **tune the system** and have **applied some configuration changes** that will help us improve our performance going forward. Last Sunday we applied an update from Blackboard that included a **performance fix** that was recommended by Blackboard as well as patches for a number of other functional problems that had been raised by Faculty. While this update did require an outage relatively close to the start of term, we felt it was important to do everything possible to prepare us for the upcoming term.

Along with technical improvements, we have also been focusing on improving support for users. CTLT and UBC IT are working together to deliver coordinated support for Learning Applications. For the month of September, resources from UBC IT and CTLT will be co-located on the 3rd floor of Irving K. Barber Learning Centre. They will provide email, phone, and drop-in support (both technical and functional) for instructors. In the background we have also arrange for specialist stand-by support from Blackboard to help us deal with any issues that may arise.

*UBC Connect continues to encounter major service disruptions*

Jovana Vranic, *The Ubyssey*, November 1, 2013

Since the beginning of the term, the UBC Connect website has encountered multiple major service disruptions.

On Oct. 20, there was an hour-long outage. Jennifer Woo, communications manager for UBC IT, said this was caused by a combination of problems within the application which caused Connect to run slower than usual. On Oct. 28, there was another 45-minute service disruption. This was most likely caused by a network issue, according to Woo.

The outages have been disruptive to students.

“[Connect] is just slow in general,” said Rachelle Graham, a first-year psychology student. “I also find it very confusing to navigate…. It’s really only like a last resort for me.”

“One day, I couldn’t log in [to Connect] at all,” said Katarina Trifkovic, a first-year Arts student.
“It was an inconvenience, but not really a surprise. This kind of thing seems to happen all the time.”

The Connect website is a platform created by Blackboard Inc., a global education software company. According to Woo, Connect relies heavily on its vendor, so the hiccups in the program’s performance are not unique to UBC.

“We are working with Blackboard, [but] we first have to identify the problems,” said Claudio Pini, director of application management services for UBC IT.

“It’s a very complicated application, and there is not just one root cause,” Pini said.

Many of the disruptions are caused by outside network issues at Blackboard Inc. According to Woo, this makes it difficult for the technical team at UBC IT to pinpoint the specifics of many of the issues with Connect, and try to solve them independent from Blackboard Inc.

Woo said that over the past month, many changes have been made to improve the operation of Connect, including moving to a new server, implementing a caching tool for better responsiveness, introducing application patches and adding supplementary servers.

* 
Letter to the Editor, published in The Ubyssey, November 24, 2013

To the editor:

We share the concerns over the Connect problems and would like to assure you that finding solutions has been given a very high priority. UBC IT staff have been working diligently with the software vendor to fully understand and remedy the problems.

When the makers of our old WebCT Vista Learning Management System (LMS) decided that they will no longer provide support and eventually withdraw WebCT Vista from the market, UBC had to look for a new solution. To make a well-informed decision, we led an extensive examination of options, looking at functional requirements of the academic community; fit with other existing UBC IT-supported platforms that need to connect to the LMS; practicality and ease of transition; what was known at the time about the quality and reliability of available products; as well as the cost of investment relative to what the system would offer.

Following a review process in 2010-2011, our academic community selected Blackboard’s Learn, which is the software behind Connect and which was also the choice of several other universities, including the University of Toronto. We began to introduce Connect in 2012, gradually converting courses to the new system. For nearly a year, course conversations went fine and the system performed well. This September, however, when we converted the final load of courses, the new system unexpectedly started to buckle.

In September, we experienced several outages and very poor response times for the whole community. We worked with the software vendor to diagnose the problem, apply immediate remedies and consider longer-term solutions. Over the past two months, we updated and tuned
the software several times and added more hardware to increase the size of the engine. Consequently, October was better, with four shorter outages and many groups of students and faculty reporting acceptable response times.

These difficulties with Connect have surfaced at a time when the university is encouraging and investing in more flexible learning options that call for an increased use of online tools, making the situation particularly challenging for everyone. We realize the difficulties that students and faculty have experienced and appreciate your patience as the IT team continues to work on making the system fully stable.

Reddit Thread on Connect, November 2016

Issues with Connect? (self.UBC)
submitted 2 hours ago by PeachBBT
Anybody having issues logging into Connect with their CWL? Every time I type in my username and password, it redirects me back to the login page (but without any red text telling me that my information is wrong). I tried typing in a wrong combination, and that redirected me back to a login page with red text. I tried logging into SSC with my CWL and that worked fine.

Does anybody know what's going on?

  [-]PeachBBT[S] 1 point 57 minutes ago
  I was using ShawOpen! I think it might actually be the ShawOpen network because I moved within range of a library's wifi and now it's all good.

- permalink
I can get on fine as of ten minutes ago.

Issues like this are business as usual for Connect. Restart, try a different browser, and/or wait half an hour, if you haven't already. If you have, and it's still not working...put pressure on UBC to buy better software?

I'm using a different wifi network and now it's all good c:

But yea... I wish UBC would stop building rivers on university blvd and start buying better software instead :(

Have you tried going incognito? Connect sometimes gives me attitude but that usually solves the problem.

My stupid tablet that only runs IE doesn't believe in incognito, apparently...

Update, May 25, 2017:

CONNECT, CONNECTED
Your survey is here. Take the Survey

https://ubcarts.ca1.qualtrics.com/jfe/form/SV_9ZuXXksH4GpNUuF?Q_DL=5d5zrLW1byPB9L7_9ZuXXksH4GpNUuF_MLRP_8kQAS4a926fythz&Q_CHL=email

Nudge, nudge, this is a reminder to take 10 minutes to tell us about your need for support in moving your Connect courses to the system that will replace it. My original message from last week follows...

(Don't worry, this isn't a phishing message. I know you're all freaked about this now. But you should be able to tell this one is legit: the message below is more-or-less grammatically sound, even if it's in a rather quirky, folksy style. And it includes a Canadian political joke that internet con-artists don't have the sense of humour for. [I told you it was more-or-less grammatically sound and then ended that sentence with a preposition -- oops!].)

---------------------------------------------

You know that Connect is on its way out and another system will take its place. We won't know which system it is until mid-June, but we must start preparing for the migration because the new system will be available for teaching this September. Only some Arts courses will use the system in September, but all courses must be moved by the following September, 2018.

In order to help you get your courses migrated on the timeline that fits you best, we need you to do a mandatory census (i.e. not the Stephen Harper kind) to tell us what you need. It should take 8 minutes or less.

Follow the survey link below and it will automatically show the courses you have had in the Connect system. We expect this to be 99% accurate,
but if you see courses that you didn't teach, please indicate 'this is not my course'; or if you don't see courses you did teach, fill in those courses manually in the survey. If you're uncertain about anything, please contact us at arts.helpdesk@ubc.ca.

If you have been using another system for your online course presence, we can help you get on board with the new system whenever is convenient for you. For that, please email us at the address above.

Thanks for your co-operation,

Fred Cutler

Academic Chair, Arts Instructional Support and Information Technology
Associate Professor, Political Science

The following message is sent on behalf of Dr. Angela Redish, Provost and Vice-President, Academic pro tem. You are receiving this as a dean (UBC Vancouver). Kindly distribute widely. Thank you.

Title: UBC selects Canvas as replacement for Blackboard Learn (Connect)

We are pleased to announce that following extensive consultation and evaluation UBC has selected the Canvas platform (by Instructure) as the replacement for Blackboard Learn (badged locally as Connect). This announcement outlines timelines for access to and migration of courses into the new system, together with details of support resources and assistance for faculty, staff and students.

Canvas is a system designed for mobile and will provide expanded capabilities as well as a more user-friendly interface for faculty, students and staff. (see http://lthub.ubc.ca/projects/learning-tech-environment-renewal/project-updates/ for further details) We are in the final stages of negotiation and we anticipate that the new system will be made available for development of courses at the start of July. Over the past two months, the project team has been working with Faculty leadership and local instructional support units to determine their preferred timeline for transition of courses and programs. First courses will be offered in Canvas this September, with all courses migrated to the new system by September 2018.

We are committed to providing a range of support resources to help faculty, staff and students navigate this transition effectively. Canvas is widely used across world-leading research intensive universities, and the move to it represents a significant opportunity for UBC to further enhance the way digital tools can support and enhance student learning. To find out more about the platform’s capabilities, support resources and drop in consultation sessions that start next week, please visit http://lthub.ubc.ca. Specific questions about the product, the timetable or the support available to you, should be directed to lt.hub@ubc.ca in the first
instance. On the advice of peer institutions consulted during the evaluation, UBC has contracted for 24/7/365 support for Canvas, for the period of the implementation, meaning that someone will be available to answer questions about Canvas at all times. Questions about integrations with Canvas, or UBC specific tools, will be referred to UBC staff for resolution during normal working hours.

The selection of Canvas follows a consultation process that began last Fall and was led by faculty and student secondees to the project; two systems were shortlisted at the end of the 2016W1 semester (Canvas by Instructure and Brightspace by D2L). Ten courses were then piloted (5 in each system) during the 2016W2 semester, across a range of Faculties and disciplines across both campuses. The user experiences of faculty, support staff and students in these courses contributed significantly to the overall evaluation of the two systems. The project evaluation committee, comprising faculty, staff and students, scored the systems as part of a formal procurement process and recommended that Canvas replace Blackboard Learn as the core of our Learning Technology Environment.

We would like to take this opportunity to express our gratitude to Simon Bates, Jennifer Burns and the entire project team for the way in which they have moved this project rapidly from initiation to implementation in less than 12 months, whilst at the same time ensuring that the voices and needs of faculty and students as primary users of these systems have been kept in clear focus at all times.

Angela Redish,
Provost & Vice-President Academic pro tem
UBC Vancouver

You know tbh, I never actually had any major problems with connect, so I dont know why so many people hate it so much.

• permalink
• embed
[–]the_fly_guy0423Science 14 points 20 hours ago
Can confirm here, as a TA it's awful trying to upload a whole class's grades only to have the system crash and wipe out... every single grade for every student

• permalink
• embed
• parent
[–]pikachufan2164Alumni 1 point 4 hours ago
You need to create a new grade column for what you're entering, export the grade book as a .CSV file, edit it to include the new grades, then import it back in.

  Connect was anti-mathematics. This was on top of its operational faults.

- permalink
- embed
- parent [–]NightHawkRambo 4 points 22 hours ago
  Try having a class primarily taught on there, you'll see what all the hate is about.

- permalink
- embed
- parent [–]ubcvoice 3 points 22 hours ago
  it's awful for faculty to use, and tended to crash whenever there was anything more than typical load on the system.
Ah I see, I remember a lot of my profs mentioning that connect is difficult to use

- permalink

*blush*
UBC dis-Connects and switches to Canvas platform

By Joshua Azizi

The Ubyssey, June 14, 2017

UBC is replacing Connect with Canvas, a cloud-based learning management system designed by Instructure.

The switch will occur over a 15 month transition period where some courses will use the Canvas system while others will remain on Connect. By September 2018, all courses will be located on Canvas.

This decision came 10 months after UBC began their search for a new program to replace Connect. Since the university’s contract with Blackboard Learn — the company that owns Connect — ends in 2019, Connect’s outdated interface and long history of usability issues gave UBC an incentive to look for another platform.

To decide on the system, UBC tested five courses with Canvas and five courses with Brightspace — a learning management system designed by DL — in the second semester of the 2017 winter term. Canvas was then adopted as Connect’s official replacement after UBC reviewed feedback from lecturers and students in these test classes and researched other universities’ experiences with these programs.

What is Canvas?

In many ways, Canvas is similar to Connect as a learning management system. What distinguishes Canvas from its predecessor is that it’s significantly more user-friendly.

As a result, the reception to Canvas’s interface and design was very positive, according to Simon Bates – UBC’s senior advisor, teaching and learning and one of the sponsors in the project to replace Connect.

“We got feedback from students who were in these pilot courses and all of them indicated that the Canvas interface was much better than the interface in Connect,” he said. “It’s simpler, it’s cleaner and it’s easier to navigate.”
Beyond this accessibility, users can also access Canvas via mobile devices — a format that Connect did not accommodate for — and download additional tools and applications to the system.

“The mobile experience is actually pretty good,” said Bates. “You can not just view things — you can actually contribute to discussions, you can take assignments and look at when your deadlines are due.”

What's wrong with Connect?

Over its time serving UBC, Connect has become notorious for its user-unfriendly layout and tendency to crash. The system experiences frequent programming disruptions and undergoes scheduled maintenance on a very regular basis, as demonstrated in professor of geography Elvin Wyly’s anti-Connect document “Disconnect.”

“There were some severe limitations around Connect in terms of usability and the interface,” said Bates. “Certainly students who were on campus a few years ago would remember that Connect went down for almost a week at the start of the 2013/2014 academic year.”

According to him, this disruption occurred due to the large amount of new users that the website had at the time. In contrast, Canvas won't experience these frequent scheduled upgrades and downtime periods because it operates using cloud-based technology — information is stored over the internet and resources are automatically allocated to meet the demands of high user traffic.
On a r/UBC thread called “UBC has replaced Connect with the Canvas platform,” users also discussed how UBC faculty members have had a lot of difficulties using Connect in their teaching. One particular user delved into the difficulties of grading on the system.
“You need to create the a new grade column for what you’re entering [sic], export the grade book as a .CSV file, edit it to include the new grades, then import it back in,” said Reddit user “pikachufan2164.”

In contrast, Canvas offers an additional tool called SpeedGrader, which allows instructors to grade students’ assignments offline and provide them with feedback within a single frame.

As a result, most UBC faculty members are glad that Connect is on its way out, according to Bates.

“Well thank goodness you’re actually changing the system, we’ve been telling you for years that it’s not user friendly, it’s click heavy, it’s not responsive’ — there was a lot of that from faculty,” he said.

However, he also noted that some were displeased that UBC was abandoning Connect after already spending many years figuring out how to make it work.

“There were some people who were saying, ‘we’ve now gotten to grips with Connect, we’ve learned to live with it, we’ve got it doing what we need it to do, please don’t change it,’” said Bates. “So as you might expect, there’s a range of opinions in a place as large and diverse as UBC.”

What happens during the transition?

Since the transition from Connect to Canvas will take place over a 15 month period, students will likely be using both platforms over the next year. Bates estimated that fewer than half of the courses will use Canvas in the upcoming winter term’s first semester, most of the courses in the second semester and all of the courses by next year’s summer term.

Different faculties are also taking different approaches to when they want to transition. For example, the faculty of arts is hoping to move all of their first year courses onto Canvas by September 2017, while others are planning to get a better grasp on the platform before they make the switch.

Overall, Bates believes that this longer migration period — instead of an eight week period — will give students and faculty more time to adjust to Canvas.

“For a place the size and complexity of UBC, that’s just not practical,” he said. “Plus, that also would mean that people wouldn’t have enough time to learn about some of the features that the new system has that they might want to build into their courses.”

Nonetheless, UBC will still be committed to completing this switch in no longer than 15 months.
“The last time UBC changed its learning management system, it actually took three years to move everything from one system to the other,” said Bates. “That’s just too long in an environment that’s changing this quickly, so we’re absolutely adamant that we’re gonna try and get everything done within 15 months.”
ATTN: IF YOU USE...
LIBRARY COURSE RESERVES IN
MULTI-SECTION COURSES OR
CROSS-LISTED COURSES

If you teach one course with multiple course codes, these courses are not merged in Connect by default. If the reserves have been done in only one Connect instance of the course, they will usually have to be redone in the other course even if it is really the same course. This can take a long time.

Avoid this situation by contacting us early. We can merge the courses so you don’t have to do the online course reserve process twice.

**STEP 1**
SEND A REQUEST TO MERGE YOUR COURSES IN CONNECT
E-mail: arts.helpdesk@ubc.ca
Pro-tips: Do not add content into your Connect courses until the merge is complete.

**STEP 2**
ADD ITEMS TO LIBRARY COURSE RESERVES
Once the courses have been merged in Connect, you can start submitting requests for library course reserves.

For information on processing times: [http://tinyurl.com/ubclocr](http://tinyurl.com/ubclocr)

WARNING: DON’T SKIP THE FIRST STEP!
If you request library course reserve items for only one of the courses before the merge, then the items may need to be resubmitted for the other section and this can cause significant delays.

Can’t log into connect either

[-]Jiruma 3 points 17 hours ago
Yup as of right now I still can not log into canvas :( rip studying

[-]marianne_schroeder 3 points 13 hours ago
the services are back up http://bulletins.it.ubc.ca/archives/31618

[-]louisstlouisobispo 5 points 16 hours ago
Here is the bulletins site http://bulletins.it.ubc.ca

[-]MondayToFriday 5 points 15 hours ago
Specifically, Multiple Enterprise Services Unavailable – December 15th, 2017

[-]Jopika 2 points 17 hours ago
I was able to log into Connect after clearing my cache, perhaps try that with Canvas?

That error message indicates it's a server authentication error, they might have had some kind of server mishap and are working to restore it now.

[-]louisstlouisobispo 2 points 16 hours ago
Check out the IT bulletin side. Whole bunch of services impacted.

Canvas works but connect doesn't for me

[-]dfdfdsfdsfe 1 point 17 hours ago
wtf it's reverse for me, are you sure?? haha

People on discord were saying connect was down for some people, I can't use either... most likely an ssc issue.

It's reversed for me too, Connect is fine but Canvas won't have it. Glad my exam is at 9am tomorrow and I need the practice final :( 

its back up for me!

Are you able to log in yet? It is working perfectly fine.

Both Connect and Canvas are still down for me

I can't log into connect, even with Incognito mode (this worked for me once). I also cleared my cache.

Canvas works fine, though.

Posted to reddit/r/ubc, January 7, 2018:

Anyone else finding it really inefficient and cumbersome to track classes? few things I’m noticing:

There is EWA, connect, edX, course website, canvas, piazza, google drive (that’s seven in my first year), And each with stuff
hidden in nebulous tabs (ie problem sets in discussions of edX for CPSC 110).

Also this isn’t a big thing, but there are separate logins for every sub-domain of the website. And then there’s the occasional .stu username.

Also having trouble with email: I can’t attach anything because the button is hidden behind the send button. Also pasting links creates a duplicate after I hit enter. And my email client doesn’t work with my ubc address with the instructions they’ve provided.

Wifi is also unstable, which is kind of irritating when you need to submit something.

Anyway, mainly it’s the myriad of places instructors spread their course material. It’s a little annoying as a student as I’m using on average three of the systems mentioned above per course, and frankly some of the uses is plain negligent and lazy. Would be nice if there was some kind of school wide policy in place that prevent instructors from doing this.

I get that some of the stuff is legacy and it takes time to migrate, but I’ve done I’ve studied in a several other schools, and they don’t nearly have the problems that this school has.

Is it just me?

What was the class website system before Connect? (self.UBC)

submitted 15 hours ago by KirnMXArts

Hi r/ubc! My wife and I are both UBC alum, class of 2015. We were just chatting and I was mentioning the new class website "canvas"
(I'm still at UBC because law school). She responded "A new one?!? Connect was brand new!"

Which prompted us to ask, wait, **WTF WAS THE OLD ON CALLED?** Anyone remember?

The one right before Connect was WebCT Vista.

[-]KirnMX Arts[S] 16 points 15 hours ago
We both just shouted out loud "oh shit vista!"

God I remember all the complaints about that. I also remember people asking why we needed a new version. People are funny.

[-]ionparticle Staff 3 points 14 hours ago
All the complaints were cause the previous version, WebCT CE 6 was actually better than Vista. The company who made Connect, Blackboard, bought WebCT out and proceeded to completely destroy it. Judging by how "well written" Connect was, it might not even be malicious, just utter incompetence.

[-]--xx 2 points an hour ago
TIL WebCT was actually developed at UBC.

[-]Tingst -3 points 15 hours ago
I think it used to be D2L

[-]Thoughtulism 2 points 4 hours ago
It's never been D2L

[-]Tingst 1 point 4 hours ago
I guess it was only for joint programs with BCIT then.

Canvas was able to load, but **it for some reason had unenrolled me from all my classes**... When will I learn not to leave online quizzes till the last minute.... -sigh-

---

Users are experiencing CWL authentication issues for services such as Service now, UBC Directory admin, Canvas, Connect etc. Technicians are aware of the issue and are working are investigating.

~UBC IT

---

Could you explain your idea in more detail, I'm interested.

- How's it more robust?
- Isn't a cookie also a token but utilizing the built in mechanism of the browser to handle it?
- You still have a central point of failure, the service that generates the tokens and validates them. If you decentralize this then you're distributing token creation logic and distributing a secret key to multiple applications (and have to maintain them being synchronized).
- Between pages are you going to be doing URL rewriting if you're not using a cookie?
- Are you intercepting these requests with a filter to perform authentication?
- How are privileges managed? Centralized authority with lookup or embedded in the token?

---

... Literally a google away

Farewell, Connect

September 5, 2018

Farewell, Connect
Farewell, Connect

Final notice: A reminder to instructors that UBC is retiring Connect on Friday, August 31

This is a final reminder that Connect is being decommissioned on August 31, 2018. As of September 1, Connect will no longer be accessible for teaching UBC courses.

If you do not have a plan in place for transitioning your Connect courses to Canvas, please contact your faculty’s Instructional Support Unit (UBC Vancouver) or the Centre for Teaching and Learning (UBC Okanagan) as soon as possible.

If you have course content on Connect that you would like to save, please see the instructions for exporting your course content.

Learn more about UBC’s Connect retirement plan.

And then a few hours later:

12
r/UBC Posted by u/pyCharmGuy

Can't log on to canvas.
When I log on I receive this message:
Internal Server Error

The server encountered an internal error or misconfiguration and was unable to complete your request.
Please contact the server administrator at root@localhost to inform them of the time this error occurred, and the actions you performed just before this error.
More information about this error may be available in the server error log.

Any way I can seek help?
Update: Now working again, thank god.

RIP Connect, the Learning Management System that tried its best but failed miserably

By Joshua Azizi
Sept. 10, 2018 · 2 min read
We hardly knew ye and thy outdated interface. *File Joshua Medicoff*

A year after the university began its migration onto the [Canvas](https://www.canvas.net) learning management system, UBC quietly retired Connect on August 31.

Since 2012, Connect provided tens of thousands of UBC students with an online interface to access readings, receive notifications from professors, review their grades and take online quizzes. But for many, the end of Connect will be met with cheers, as the system was well known for its tendency to crash or malfunction.

A simple search for “connect” in r/UBC shows multiple instances of users struggling to use or access the system amidst frequent outages and malfunctions. In September 2013, an increase in new users caused Connect to crash constantly throughout the term. At one point, it was out for a full week.
Many of these glitches are compiled in “disConnect,” a 30-page document by UBC Geography professor Elvin Wyly that outlines Connect’s history of usability issues.

Faculty members also struggled to use Connect. In a previous comment on r/UBC, user pikachufan2164 discussed the difficulties of grading on the system.

“You need to create the a new grade column for what you're entering [sic], export the grade book as a .CSV file, edit it to include the new grades, then import it back in.”

Since their contract with Blackboard Learn, the company that runs Connect, expires in 2019, UBC began to look for an alternative learning management system to use. They eventually adopted the Canvas platform, and began a transition period onto the program last year.

When a r/UBC user posted a screenshot of UBC’s announcement that it was discontinuing Connect, commenters expressed their grief with solemnity and grace.

“good riddance, connect”

“you're trash, connect”

“Happy days, at long last!”

“finally.”

In a previous interview with the Ubyssey in 2017, Simon Bates — associate provost, teaching and learning at UBC — said that since Canvas uses cloud-based technology that automatically allocates resources to manage increased traffic, it doesn’t experience the same interruptions that Connect does. So with Connect gone and Canvas at the helm, it appears that happy days may be upon us after all!

Or maybe not. Who knows.
Dear Instructors,

Are your Connect and Canvas courses ready for the fall semester? Take a moment to look through this checklist and make sure. Please keep in mind that the majority of you will still be in Connect; those instructors whose courses will be delivered on Canvas have already been contacted.

Please Note: We are no longer accepting requests for Connect migrations into Canvas. In very special cases we may consider creating an empty Canvas course shell upon request.

Refer to our checklist to make sure your course(s) are set for the upcoming term:

- **Check that your courses are listed in Connect or Canvas.**

  **Connect**
  - Go to connect.ubc.ca and login with your CWL.
  - Your course(s) will be listed under the Course List module on the “My Connect” tab or on the “Courses” tab.
  - If you do not see all your fall course(s) listed, please contact Arts ISIT at arts.helpdesk@ubc.ca and indicate which course(s) is/are missing.

  **Canvas**
  - Go to canvas.ubc.ca and login with your CWL.
  - Your course(s) will be displayed as Course Card(s) in the Dashboard or in the All Courses list in the “Courses” tab.
  - If you do not see your fall course(s) listed, please contact Arts ISIT at arts.helpdesk@ubc.ca and indicate which course(s) is/are missing.

- **I have two separate sites that need to be merged together (e.g. cross-listed courses).**

  **Connect**
  - Cross-listed courses are not merged in Connect by default. Contact arts.helpdesk@ubc.ca and indicate the course number and section of the courses that need to be merged.

  **Canvas**
  - As this is a soft launch of Canvas, merging of sections is not possible for this semester. This function will be available for January.

Keep in mind that Arts ISIT offers a wide range of workshops on many different learning technologies. Because of the recent Canvas implementation, we have scheduled numerous training workshops that will help get you started in our new online learning environment. Register for a Canvas workshop today: [http://www.arts.ubc.ca/workshops](http://www.arts.ubc.ca/workshops).

If your students require support or assistance, you can direct them to the IT Service Centre either in person (Koerner Library), by phone at 604.822.2008, or online at [http://web.it.ubc.ca/forms/isf/](http://web.it.ubc.ca/forms/isf/).

If you have any questions about any of these items or if you require assistance with your courses, please do not hesitate to contact us at arts.helpdesk@ubc.ca. Please note that, due to the high start-of-term demand, all requests have a two to three day turnaround time as we triage the many requests.

Best regards,
